

# Fostering Research & Innovation for Food & Nutrition Security

# An EU perspective

Dr. Karen FABBRI RTD.F.3 (Agri-Food Chain) European Commission

## **Cssr Moedas' priorities for R&I**

**→ Food**, Health, Water, Energy Food and nutrition security

More innovation, drive investment
Open innovation, open science
open to the world

#### What is at stake for food & nutrition?

- Urgency & complexity: Compounded effects of population growth, urbanization, resource scarcity and climate change - affect the entire food chain (Europe & globally)
- Today: 3.5 B people are undernourished, yet ~ 2 B people are overweight 'double burden' of malnutrition (NCDs on the rise e.g. diabetes)
- To feed 9 B, food production must increase by nearly 60% by 2050, yet 1/3 of the food we produce today is wasted.

# Food & Nutrition Security @ EXPO 2015 Milan

- Almost EU 200 workshops, conferences, events
- Eu expo Scientific Steering Committee chaired by F. Fishler
  - Discussion paper "European priorities for R&I"
  - Four policy recommendations: systems approach, engagement/awareness raising, innovation for impact, international panel on FNS
- High Level Conference: "Strengthening Global Food and Nutrition Security through research and innovation", 15 Oct 2015:
  - Commisioner Moedas launches (with the support of Commsioner Hogan) year-long dialogue with staleholders to design a 'Food Research Area' (FRA) Strategy
  - FRA Stategy will build a coherent R&I policy on FNS in Europe and with a global outreach

#### EU initiatives to make a difference

- Horizon 2020 Work programme of Societal Challenge 2 (whole food system approach) and considerations for next FP
- Joint Programming Initiatives, science diplomacy partnerships (ie: Africa, PRIMA, ASEAN, N&S Atlantic, China, Brazil, etc.)
- European Technology Platforms: in particular 'Food for Life': Food&Drink Industry: 2016 New strategic R&I agenda, implementation plan & new roadmap (sustainability & nutrition) may lead to possible cPPP
- Synergies with other funds like ESIF for smart specialisation in the field of FNS
- EIT New Knowledge and Innovation Community on 'Food' (call to be launched in Jan 2016): boost innovation capacity via knowledge triangle (education, research & business)

## **The Vision**

The Food Research Area will be based on a vision for Food and Nutrition Security whereby R&I contributes to building

"A resilient food system that provides sustainable, affordable and healthy food for all"

## FRA - four priority areas

- 1. Building a climate and global change-resilient food system via the sustainable use of the planet's resources so as to preserve ecosystems services and mitigate impacts of climate change
- 2. Implementing safety, diversity and circular economy principles across the whole food production, processing and distribution chain
- 3. Eliminating hunger and malnutrition, reducing food and diet-related illnesses, and helping citizens adopt sustainable diets and healthy lives
- 4. Boosting innovation in support of a thriving, diverse and adaptive food economy delivering jobs and prosperity, while empowering communities

## FRA Principles and Focus\*

science education
governance skills development
circularity openness to society sustainability
circular economyinter & transdisciplinarity
cascading approach resilience to climate & global change
capacity building institutional & open innovation
diversityforesight reflexivity socio-cultural dimensions
food first scientific literacy
new business models

<sup>\*</sup> in alignment with the 4<sup>th</sup> SCAR Foresight & EU Expo Sci Com. Recommendations

# FRA activities to achieve impact

- 1. Design & implementation of priority-driven R&I Programming (H2020+): Nutrition, Climate Resilience, Sustainability and Growth
  - Means to design new Strategic Programme & WP (2018-2020) and secure next MFF funding (FP9?)
- 2. Research programme alignment via International Flagships and Public-Public Partnerships (P2P)
  - JPIs, ERA-NETs, IRC, Belmont Forum, etc.
  - Africa, China, ASEAN, Brazil, PRIMA, etc.
  - 'Widening' by involving other R&I funders (ex: foundations) and greater international outreach (beyond EU)
  - Actions fostering skills development, FNS education, capacity building of R&I actors

## FRA activities to achieve impact

#### 3. Boosting Investment & Innovation

- Removing barriers to innovation (InnoRefit)
- Supporting demonstration pilots and proofs of concept
- Rejuvenating ETPs for possible cPPP (Food & Drink, etc)
- Building synergies with other funds, also to boost 'place-based innovation' (regions, cities): S3, ESIF, RDF, EIP, KIC Food, EIB, etc.
- Boosting FNS via use of ICT and FET

#### 4. Fostering Open Science

- 'Food Commons' for research data and valorization, connecting initiatives and infrastructures
- Platform to convene EU and International efforts on FNS RI activities and existing actors for multi-actor and public engagement
- Regulatory alignment and support to relevant thematic policies (fostering science-policy-society interface)

## Latest H2020 calls for proposals

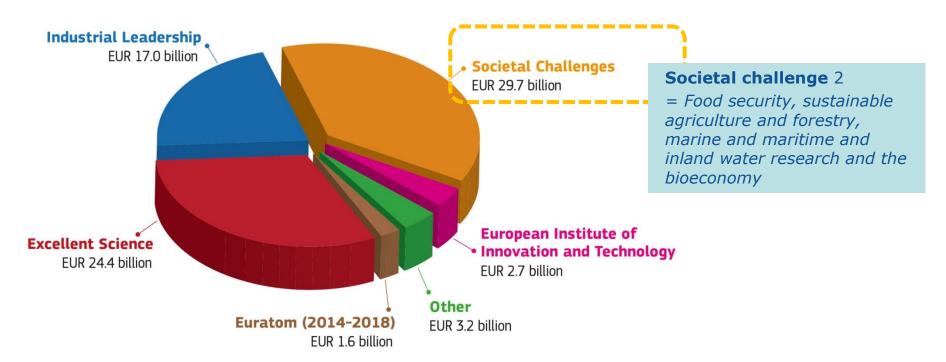

- Published Oct 2015
- Info Day: 25th Nov in Brussels
- Submission deadline: Feb 2016 Weblink

#### **HORIZON 2020 : € 79 billion from 2014 to 2020**

#### **HORIZON 2020 BUDGET (in current prices)**

# Societal Challenge 2 - WP 2016-17 OBJECTIVES CALLS delivery

Ensure Global Food
Security, by more efficient
and resilient primary
production and related
industry

Sustainable Food Security €414M

- More resilient and resource-efficient value chains
- Environment-smart and climatesmart primary production
- Competitive food industry
- Healthy and safe food and diets

Demonstrate the innovative potential of the Oceans, by bringing technologies to the market

Blue Growth €68M

- Innovation for emerging bluegrowth activities
- Healthy Oceans for healthy people
- Ocean observing, surveying and monitoring capability

Develop rural and coastal areas, through new territorial approaches and new business models

Rural Renaissance €128M

- New approaches towards policies and governance for rural areas
- New value chains and business models
- Rural innovation and skills

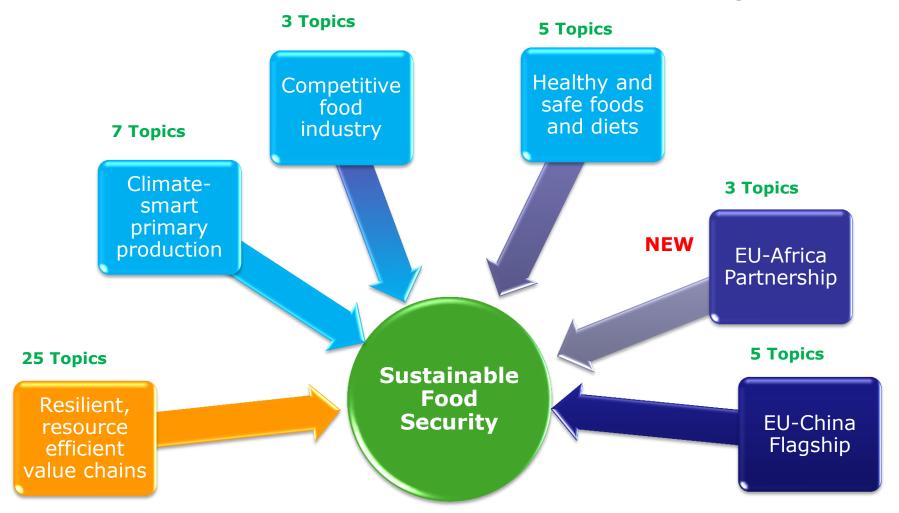

Re-industrialise Europe, through new bio-based value-chains, securing sustainable biomass Bio-based innovation for sustainable goods and services - €27M

- Sustainable biomass supply
- Biobased markets of the future

## SFS - 2016-2017

#### Info Day - 25th Nov

Total: 48 topics\*

# Thank you

Let us work together
