

Metrics, Drivers and Models. Results and reflections

Entry point into the food system:
Sustainable diets

Moderator : Jacqueline Broerse

Professor of Innovation and Communication, VU Amsterdam
& SUSFANS Advisory Board

Guiding questions

- How can the SUSFANS framework be a helpful guide for non-scientific users in **monitoring, assessment and identifying priority areas** for policy action?
- What is the assessment of the **performance of the food systems** in the EU and its member states, in terms of the environmental, social and economic **sustainability of consumer diets** and food supply systems?
- What opportunities and challenges for **food systems transformation** under the 2030 Agenda and the Paris Agreement on Climate Change are suggested by the **SUSFANS foresight** study?

CONFERENCE KIT? UPDATED PROGRAM?
